

Israeli Combat Medicine for Operators

You may be the only person available to provide medical care to wounded team members. Life threatening injuries require fast and skilled intervention. Would you know what to do?

CRI's **Israeli Combat Medicine for Operators** course provides Special Forces, PSD and other Counter-Terrorism Operators the knowledge, skills and confidence to deliver emergency medical care in combat/tactical situations. This course is appropriate for a range of skill levels. No prior medical training is required, and Operators with prior medical experience will benefit from this Course as well. CPR/AED training and certification is included, as is weapons familiarization and live-fire training. Instruction emphasizes a pragmatic approach with hands-on skills sessions, force-on-force scenarios and individual instruction.

Course Content:

- Approaches to Medicine in Combat/Tactical Environments
- Patient Assessment: Triage, Primary and Secondary Surveys
- Basic Life Support: Artificial Respiration, CPR/AED
- Basic and Intermediate Airway Management
- Hemorrhage/Bleeding Management–Tourniquets/Hemostatic Agents
- Chest Injuries and Pneumothorax Decompression
- Cervical Spine Injuries and Immobilization
- Burns and Blast Injuries
- Musculo-skeletal Injuries and Splinting
- Emergency Wound Care and Infection Management
- Environmental Emergencies (heat, cold, drowning)
- Medical Emergencies
- WMD/CNBR-Chemical, Nuclear, Biological, and Radiological Injuries
- Patient Extrication and Movement
- Medical-Legal Issues
- Weapons familiarization
- Tactical vs non tactical decisions

Special Topics

- Specific Regions: Medical Planning
- Survival Topics
- Medical Kits

Additional/advanced topics may be included depending on student skill level. Please call for Details.

Topics may be added or modified depending on student requirements and at CRI's discretion.

Course Duration: 4 Days

Course Dates: November 13-16, 2007

Cost per Trainee: \$975 (discounts given for multiples or groups)

This 4 day intense training atmosphere will test the abilities in stress related areas and in classroom settings.

This is a Basic training program that is a prerequisite for the **Israeli Combative Medicine for Medical Professionals Planned for 2008.**

Forms that must be completed PRIOR to the start date of the Training Course:

1. Registration form
2. Background Check (please include photo ID copy)
3. Proof of clean criminal background from your local police department or current Concealed Weapons Carry license
4. Physical Activity Readiness Questionnaire

CRI, Inc. reserves the right to refuse training to any group, entity or individual.
